

# The Power of an Upgrade and Strength of a Health Check

## Give Your System a Boost

We know it sounds like a hassle, but upgrading your Ephesoft platform can save you time, money and headaches in the future, while delivering a more robust, feature-enhanced, performance-driven solution today. It's also important to stay up to date when you call for support issues, as older versions become outdated. Your investment in Ephesoft is important, so let us help you deliver the best results for your business and your customers.

## Upgrading to Ephesoft Transact's Current Version Offers More

Take advantage of up-to-date technology and features such as:

- Robust performance and speed
- Enhanced ICR handprint
- Enhanced ID reading with recognition of over 200 global identification types
- Ability to integrate mobile capture or customize your own app with the SDK
- Ability to use Cloud HyperExtender for high performance and scalability of the most resource-intensive process
- Extended global language support
- Enhanced Web Services and APIs

## Test Your Tech Fitness with a Health Check

Unsure if you're ready for an upgrade? Perhaps you don't know what version you have? Or maybe you utilize an older, on-premises version and are interested in moving to the cloud? No matter what the case, our Professional Services team can conduct a health check on your current system and assess the best way to move forward based on years of best practice with customers worldwide.

Your health check will include:

- Review your existing solution for speed and performance
- Expand your solution into new use cases
- Recommend optimizations to the current solutions
- Prepare for an upgrade

If you're ready to take advantage of new, innovative solutions and make strategic data-driven decisions, contact us today:
